HOW AGENTIC AI CODING DEMOCRATIZES APPLICATION DEVELOPMENT

ship-it-with.ai

Mihai Cvasnievschi • Founder, RO AI Labs

WHO IS TALKING

MIHAI CVASNIEVSCHI

25+
years of professional software development

10+
years building AI systems

Founder of RO AI Labs

THE QUESTIONS EVERYBODY ASKS

1

CAN I REALLY WRITE CODE WITH AI?

2

HOW DO I START?

3

WHICH AI AGENT DO I CHOOSE?

4

IS THERE A PLACE FOR ME IN THE AGE OF AI?

WHY THESE QUESTIONS MATTER NOW

THREE NUMBERS FROM 2026

US JOB ADS

73%

of US tech job postings ask for AI skills.

Up from 15% in January 2024.

ADVERTISED PAY • GLOBAL

+62%

higher advertised pay for jobs that ask for AI skills.

Job ads compared, not people.

US WORKERS AGED 22–25

-19%

employment in jobs most exposed to AI.

Compared with keeping pace with less-exposed jobs.
A pattern, not a proven cause.

IT'S HALLOWEEN, SO HERE IS A HORROR STORY

$10,000 A WEEK

Senior devs offer to clean up your vibe-coded app.

THE CLEANUP OFFER

- 3 senior engineers
- 1 week
- Cut the code agents duplicated
- Keep the app working

Their example: 14 date formatters that should have been one

Source: Slopfix: three senior engineers, Hacker News front page, July 2026
odra.dev/slopfix

THE TWIST, IN THEIR OWN WORDS

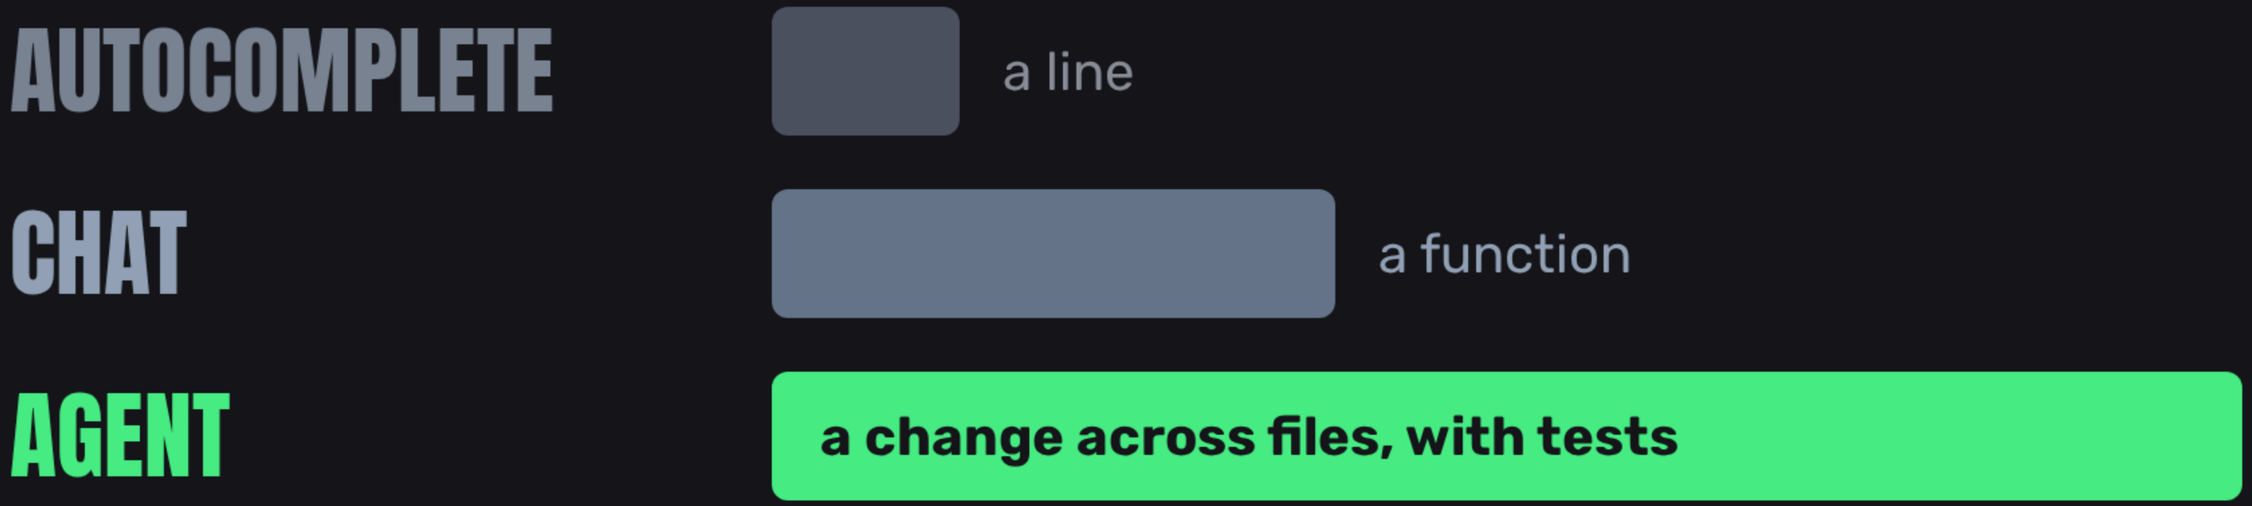

“Yes, we use Claude Code too. On a very short leash.”

Same AI. More experience steering it.
You can learn to steer it too.

Source: Slopfix
odra.dev/slopfix

WHAT CHANGED IN FIVE YEARS

HOW MUCH THE AI DOES

2 in 3 surveyed developers use a coding assistant or agent.

Source: Stack Overflow Developer Survey 2026 • AI-use question: 17,464 responses; 65.9% use a coding assistant or agent
survey.stackoverflow.co/2026/ai

LINUS TORVALDS, CREATOR OF LINUX, ON AI • 13 OCTOBER 2026

DON'T SHY AWAY FROM AI.

From: Linus Torvalds · To: Laurent Pinchart
Subject: Re: [PATCH] docs: remove Assisted-by references

"The people I respect and call intelligent are not the ones that shy away from using new and interesting tools."

"I expect people to understand what they are doing."

Source: Linux kernel mailing list, 13 Oct 2026 • debate over requiring human-written commit messages

SHIP-IT-WITH.AI, IN THREE LINES

THE AGENTS WRITE THE CODE. YOU UNDERSTAND THE PROBLEM. YOU REMAIN ACCOUNTABLE FOR THE JUDGMENT.

The opening lines of the manual.

ship-it-with.ai

Free, in English and Romanian

QUESTION 1 · CAN I REALLY WRITE CODE WITH AI?

Wednesday evening · the first message

```
› I want a browser version of Excel.
  Before building anything, propose
  the prompt I should give you.
```

HOW LONG UNTIL IT WORKS?

10 MIN	1 HOUR	1 DAY

ONE REQUEST.

A coding agent with a method, played back fast. Watch the clock in the corner.

▶ Video, 2:03 • plays in **index.html**, the offline deck in this folder

WHAT YOU JUST WATCHED

AT EVERY STEP, YOU DO SOMETHING

Your prompt starts it. Then, for each step:

1 RESEARCH

Agent: Writes the spec

You: Read the spec

2 PLAN

Agent: Writes the plan

You: Review the plan

3 EXECUTE

Agent: Writes tests and code

You: Watch. Stop it if it drifts.

4 REVIEW

Agent: Reviews the code

You: Read the findings

5 VERIFY

Agent: Runs the checks

You: Check the proof yourself

6 SHIP

Agent: Prepares the commit

You: Decide whether to ship

QUESTION 1 • CAN I REALLY WRITE CODE WITH AI?

FOUR SKILLS FOR STEERING AI

BRIEF

Say precisely what you want

READ

Read what comes back

TEST

Test before you trust

JUDGE

Know when to say “not yet”

ship-it-with.ai • Chapters 3, 5 and 8

QUESTION 2 • HOW DO I START?

YOUR FIRST THREE MESSAGES

Your agent · a first project

1	YOUR PROBLEM, IN YOUR WORDS	› Our team tracks shared expenses in an Excel file. Help me plan a small app. Ask me questions first.
2	HOW YOU WILL CHECK IT	› Before any code, list examples I can try, each with the answer I should see.
3	THE SMALLEST VERSION	› Build only adding expenses and their total. I will try it before we add anything else.

Practice example • made-up data • ship-it-with.ai

QUESTION 3 • WHICH AI AGENT DO I CHOOSE?

ONE THAT FITS YOUR PROJECT AND LETS YOU CHECK ITS WORK.

THINGS THAT KEEP CHANGING

Model names

Interfaces

Default settings

Usage limits

DID NOT CHANGE

- Control what it can see
- Control what it can change
- Control how you check it
- Control where you apply it

Source: OpenAI Codex changelog • checked 30 Oct 2026
learn.chatgpt.com/docs/changelog

QUESTION 4 • IS THERE A PLACE FOR ME IN THE AGE OF AI?

THE AGENT ASSUMES. YOU KNOW.

IF YOU BUILD	UNLESS YOU SAY OTHERWISE, IT MAY ASSUME	IN ROMANIA
A SHOP	Prices like $1,234.56	1.234,56 lei
INVOICING	Standard VAT 19%	21% since Aug 2025
AN HR APP	Easter on 28 Mar 2027	Orthodox Easter, 2 May 2027
A BOOKING APP	Dates like 10/31/2026	31.10.2026
A DELIVERY FORM	ZIP code, 5 digits	Postal code, 6 digits

The agent proposes the flows. The details are your job.

Sources: Fiscal Code art. 291 (ANAF) • Labour Code art. 139 • Unicode CLDR • Universal Postal Union • Dollar default: Miao et al., arXiv, June 2026
arxiv.org/abs/2606.17688v1

BEFORE THE WEEKEND IS OVER

START TOMORROW

One agent

Any coding agent.
You set its limits.

One project

A small app or fix.
Made-up data.

One rule

Never ship what
you cannot explain.

The manual is free: ship-it-with.ai

Manual in English and Romanian

THE FOUR QUESTIONS, ANSWERED

1 • Can I really write code with AI?

Yes. Start with four skills.

2 • How do I start?

One small change, one evening at a time.

3 • Which AI agent do I choose?

One that fits your project.

4 • Is there a place for me in the age of AI?

Is there a place for you in the age of AI?

BUILD ONE.
